JEAN MONNET CENTRE OF EXCELLENCE

Technology and Innovations for Agenda 2030 – EU Global Leadership – TIA 2030

Invitation letter

Dear Sir or Madam,

It is my pleasure to invite you to participate in a Winter Camp 2025 Workshop, which will be organised as a part of the **Jean Monnet Centre of Excellence titled "Technology and Innovations for Agenda 2030 - EU Global Leadership" (TIA2030)** led by Prof. Dr. Borut Rončević.

The Workshop is scheduled for the **18th of March 2025** and will also be held via Zoom.

TIA2030 concerns itself with competence and knowledge of the European Union's implementation of the United Nations **Global Agenda 2030** and its **Sustainable Development Goals.** The project deals with the EU dimension by exploring the role of technological innovations in implementing Agenda 2030, also with a view to the **New European Innovation Agenda** (adopted in 2022). TIA2030 aims to foster multi-level dialogue between academics, students, professionals, policymakers, policy officers, civil servants, businesses, civil society, and the general public at large, motivating them to meet and reflect on the SDGs of Agenda 2030 and the European role in it.

We will update you on the details and further activities concerning the Workshop and provide additional information closer to the event date.

We look forward to hearing from you and hope for a positive answer to our invitation. Your contribution, experience and expertise are important for the discussion and will greatly benefit the wider research community.

For more information, don't hesitate to get in touch with us via e-mail at tia2030@fis.unm.si.

Best regards,
The Jean Monnet COE Team,
Kseniia Gromova

Jean Monnet Centre of Excellence titled **Technology and Innovations for Agenda 2030** (TIA2030) is the focal point for competence and knowledge on European Union implementation of United Nations global Agenda 2030. European Union played an important role in adoption of Agenda 2030.

To achieve this, **TIA2030** engages a variety of target groups, i.e. academia, students, professionals, policy-makers, civil servants, businesses, civil society and the general public at large. **TIA2030** sets up infrastructure, methodologies, protocols, and tools to systematically collect, evaluate and make publicly available both already existing documentary resources and new primary empirical data. This is the foundation for multi-level policy debate with relevant audiences (conference special sessions, joint field trips and round table discussions) and enables to develop content and tools on EU subjects, to complement and upgrade current courses and curricula (course modules, summer schools, workshops), which will be available as Open Educational Resources.

As a result, **TIA2030** will advance interdisciplinary EU studies and deal with the phenomenon of EU implementation deficit, with a view to offer research and educational tools that could be utilised throughout Europe and beyond, to contribute to awareness of **Agenda 2030** and its implementation.
