# THEORIES OF INFORMATION SOCIETY

## Course instructions

1. During the course, students will need to complete (prepare, defend and submit) a project paper in a group of 2-3 students. Individual work is possible only in exceptional cases. In the project paper, students should design a business (start-up) idea focused on solving a real-life problem involving ICT, digital or informatics-based solutions.

2. Attendance is highly recommended. You must be personally present to defend your project paper.

**Grade composition**: project paper (100% of the grade).

To pass the course, the student needs to meet the minimum criteria set by the rules on verification and assessment of students' knowledge of the Faculty of Information Studies in Novo mesto for the production of written products (published on www.fis.unm.si under the section "Catalogue of documents"). However, to successfully pass this course, the students will need to participate actively at the course and submit a seminar work (paper) on a project on the course topics.

The content and the additional information about the course are defined in the syllabus.

More detailed obligations are presented during the course.
